## Full Stack Software Developer UI/UX Designer

Transforming ideas into high-impact digital realities. I craft performant, responsive web & mobile experiences with modern stacks. Obsessed with clean UI, robust backends, and continuous learning. Based in Kenya, working globally.

## 🧰 Experience

### Full Stack Developer (Freelance) · 2024 – Present

Self-employed / Global Clients

Developed 15+ full-stack applications using React, Next.js, Node.js, Express, and MongoDB. Led end-to-end feature design, API integrations, and optimized web vitals. Delivered PorkyDelights – a production-grade food ordering platform.

### Frontend & React Native Collaborator · 2024 – 2025

Open Source & Startup Projects

Contributed to cross-platform mobile prototypes, UI/UX improvements, and responsive design systems. Worked with teams to integrate REST APIs and real-time features.

## 🔑 Featured Projects

### PorkyDelights

[porky-delights.vercel.app](https://porky-delights.vercel.app) →

E-commerce & ordering platform with dynamic cart, admin dashboard, and payment simulation. Built with Next.js, Tailwind, Node.js, MongoDB, and JWT auth.

### BavDev Portfolio

[bavdev.vercel.app](https://bavdev.vercel.app) →

Modern developer portfolio showcasing animations, project highlights, and blog integration. Optimized performance and dark mode design.

### Mobile Delivery App (React Native)

Cross-platform food delivery prototype with map integration and real-time order tracking. Currently upgrading with Expo.

## 🎓 Education & Growth

### Self-taught Full Stack Path · 2021 – ongoing

Specialized in React ecosystem, Node.js, Python (Flask), and Kotlin for Android. Certificates: FreeCodeCamp, Meta Backend, Next.js Mastery.

## Currently sharpening

Expo (React Native), Kotlin Multiplatform, Flask & advanced system design. Always building and shipping.
